PROFESSIONAL SUMMARY

Frontend Developer with Computer Science degree and production experience building responsive, user-focused web interfaces. Developed 2,300+ lines of production JavaScript/HTML/CSS for web application serving 240+ operational hours with sub-0.5s load times. Built data visualization frontends integrating Chart.js with modern build patterns. Skilled in modern JavaScript, responsive design, UI/UX implementation, performance optimization, and API integration. Strong visual design background with Adobe Creative Suite and content creation experience reaching 250K+ users. Proficient in AI-assisted development workflows.

TECHNICAL SKILLS

- Frontend Development: JavaScript (ES6+), HTML5, CSS3, Responsive Design, Single-Page Applications, DOM Manipulation, Async/Await
- UI/UX & Design: User Interface Design, Responsive Layouts, Modal Systems, Data Visualization (Chart.js), Component Architecture, Adobe Creative Suite
- Web Technologies: RESTful API Integration, Fetch API, Session Storage, Performance Optimization, Lazy Loading, Event Delegation
- Data Presentation: JSON Processing, Dynamic Data Rendering, Chart.js Integration, Real-Time Updates, Data Table Implementation
- Development Tools: Git, Version Control, Browser DevTools, AI-Assisted Development, Agile Workflows, GitHub
- Additional Languages: SQL, Python, Java (for full-stack understanding)
- Design & Content: Adobe Photoshop, Illustrator, Premiere Pro, After Effects, Figma (basic), Video Editing

PROFESSIONAL EXPERIENCE

Frontend Developer (Freelance)

Multiple Projects / Remote / May 2024 – Present

Race Data Intelligence Suite (PACE) – Data Visualization Frontend - Designed frontend architecture for multi-vendor race data analytics platform displaying normalized data from 7+ timing systems - Implemented data visualization integration consuming JSON outputs from ETL pipeline for Chart.js rendering - Built modern frontend ready for Vite/Tailwind build patterns with responsive layouts and interactive data displays - Created reusable component patterns for race data presentation across multiple vendor formats - Optimized

JSON data handling for smooth client-side rendering and real-time updates - Technologies: JavaScript, JSON processing, Chart.js, Modern build patterns (Vite/Tailwind-ready), Responsive design

Student Tutor Dashboard – Production Web Application - Developed responsive web application frontend with 2,300+ lines of vanilla JavaScript, HTML5, and CSS3, serving 240+ operational hours with production-grade reliability - Built dynamic user interface featuring tabbed navigation, modal dialogs, data tables with pagination, lazy loading, and real-time updates without page refreshes - Implemented modern UI patterns including loading overlays with custom animations, responsive card layouts, session history with infinite scroll, and interactive comment systems - Optimized frontend performance to achieve sub-0.5 second load times through efficient DOM manipulation, event delegation, and strategic data caching - Integrated RESTful APIs using modern async/await patterns with robust error handling and loading states for optimal user experience - Designed responsive layouts adapting seamlessly across desktop, tablet, and mobile viewports using flexible CSS Grid and Flexbox - Created accessible, user-friendly interfaces following web standards with proper semantic HTML, ARIA labels, and keyboard navigation - Implemented component-based architecture with reusable UI elements and consistent design patterns - Technologies: JavaScript (ES6+), HTML5, CSS3, RESTful APIs, Responsive Design, Git, AI-Assisted Development

Tutor Availability Platform – UI/UX Development - Built SPA-style user interface for availability and scheduling platform with filter/search controls for fast data lookup - Designed UX patterns replicating familiar SaaS experiences for rapid user adoption by staff and leadership - Implemented responsive layouts and interactive calendar data visualization for enhanced operational visibility - Created clean, intuitive interface integrating calendar feeds and spreadsheet data with real-time updates - Technologies: JavaScript, HTML/CSS, SPA patterns, Calendar integration, Responsive UI/UX

Content Creator & Visual Designer

@itsnemo.mp4 (Personal Brand) | Remote | 2019 – Present

- Built and maintain personal brand with 250K+ followers across TikTok (213K+) and Instagram (64K+) through visual storytelling and content design
- Create and edit video content using Adobe Premiere Pro and After Effects, demonstrating proficiency in motion graphics and visual effects
- Design graphics and branding materials using Adobe Photoshop and Illustrator for cohesive visual identity
- Analyze user engagement metrics and platform algorithms to optimize content presentation and maximize reach
- Demonstrates deep understanding of visual design principles, user attention patterns, and interface optimization

Graduate Intern – Recreation and Sport Management

Coastal Carolina University | Conway, SC | Jan 2025 – May 2025

- Produced high-performing visual content and videos for Division I athletics social media using Adobe Creative Suite
- Created graphics, video edits, and multimedia content optimized for social media platforms and audience engagement
- Managed content calendar and analyzed engagement metrics to inform design decisions

Student Social Media Associate

University of New Mexico, Communications and Marketing | Albuquerque, NM | Jul 2021 – Jul 2023

- Created multimedia content including video editing, motion graphics, and visual design that drove 143% follower growth on TikTok
- Produced highest-performing Instagram content through strategic visual design and platform optimization
- Utilized Adobe Creative Suite (Premiere Pro, After Effects, Photoshop, Illustrator) for all content production

Student Media Associate

Coastal Carolina University | Hybrid | Nov 2023 – Apr 2024

- Created short-form video content and graphics for Division I athletics social media with focus on visual storytelling
- Produced hype montages, game summaries, and athlete features using video editing and motion graphics

TECHNICAL PROJECTS

Race Data Intelligence Frontend

Personal Project | | 2024

- Frontend data visualization platform for multi-vendor race analytics with Chart.js integration
- Modern build patterns ready for Vite/Tailwind deployment with responsive design

Tutor Dashboard Web Application

Personal Project | | 2024

- Full-stack web application with emphasis on frontend UI/UX - responsive interface with tabbed navigation, modals, and data visualization
- Implemented modern JavaScript patterns including async/await, event delegation, and component-based architecture

Forensics Database System

University of New Mexico | | 2022

- Developed web application frontend interfacing with SQL database for medical investigator office
- Built from technical specifications with focus on usable interface for non-technical users

EDUCATION

Bachelor of Science – Computer Science | GPA: 3.62 | cum laude

University of New Mexico | Albuquerque, NM | Aug 2019 – Dec 2022

- Honors: UNM Scholars, Mountain West Scholar-Athlete, Academic All-Conference, 2022 Inspiring Graduate
- Relevant Coursework: Software Engineering, Web Development, Data Structures & Algorithms, Operating Systems
- Projects: Multiple web applications with focus on user interface design and frontend implementation

Master of Science – Recreation and Sport Management

Coastal Carolina University | Conway, SC | Aug 2023 – May 2025 (expected)

ADDITIONAL EXPERIENCE

Division I Student-Athlete – Track & Cross Country

UNM & Coastal Carolina University | Various | 2018 – 2025

- Balanced rigorous academic (3.62 GPA), athletic, and professional commitments demonstrating time management and discipline
- Training toward 2028 U.S. Olympic Trials, demonstrating long-term focus and elite-level performance mindset
