PROFESSIONAL SUMMARY

Marketing Technology Specialist with Computer Science degree and proven track record bridging technical development, data engineering, and marketing execution. Architected multi-vendor data intelligence platform processing 7+ timing systems into unified analytics schema. Developed production web application serving 240+ operational hours with full-stack implementation. Grew organic social media to 250K+ followers through data-driven content strategy. Proficient in ETL pipelines, marketing automation, AI-assisted development workflows, and technical problem-solving.

TECHNICAL SKILLS

- Programming & Web Development: JavaScript, Python, HTML/CSS, SQL, RESTful APIs, Google Apps Script, Async/Await Patterns
- Data & Analytics: Multi-Source ETL, Data Normalization, Schema Design, Web Scraping (Playwright, BeautifulSoup), JSON Processing, Analytics Pipelines
- Marketing Technology: SEO, Google Analytics, Social Media Analytics, Marketing Automation, Content Management Systems, Data Visualization (Chart.js)
- Development Tools: Git, GitHub Actions, CI/CD, AI-Assisted Development, Prompt Engineering, Version Control, Agile Workflows
- Design & Content: Adobe Creative Suite, Video Editing, Graphic Design, Responsive UI/UX, Content Strategy
- Platform Engineering: SaaS Integration, Calendar Data Parsing, Cross-System Data Orchestration, Internal Tools Development

PROFESSIONAL EXPERIENCE

Data Engineer / Full-Stack Developer (Freelance)

Multiple Projects / Remote / May 2024 – Present

Race Data Intelligence Suite (PACE) – Multi-Vendor ETL & Analytics Platform -

Architected and deployed production-grade data pipeline ingesting race data from 7+ major timing vendors (XpressTiming, AdkinsTrak, DeltaTiming, RTSpt, PT Timing, TrackScoreboard, MileSplit Live, Leone Timing) - Engineered robust normalization engine converting heterogeneous vendor formats into canonical pace.v1 schema consumable by dashboards, APIs, and analytics tools - Implemented async Python scraping infrastructure using Playwright for dynamic content extraction and BeautifulSoup for HTML parsing - Designed CI/CD-ready architecture for GitHub Actions to auto-refresh data and publish clean JSON without human intervention - Built fault-tolerant ETL heuristics handling

partial data, vendor format shifts, and missing fields while producing valid structured outputs - Created interoperable JSON outputs that integrate directly with Chart.js, Vite/Tailwind frontends, Tableau, Looker, and Google Data Studio - Demonstrates exact MarTech stack capabilities: multi-source ingestion (ad networks/social APIs), schema harmonization, automation, and monitoring - Technologies: Python, Playwright, BeautifulSoup, requests, lxml, JSON schema design, CI/CD workflows

Student Tutor Dashboard – Production Web Application - Architected and deployed full-stack web application serving 240+ operational hours with JavaScript, HTML/CSS, and Google Apps Script RESTful API backend - Implemented advanced features including session management, role-based authentication, multi-layer data caching (90KB optimization, 60% faster responses), lazy loading, and real-time data synchronization - Designed normalized multi-sheet schema handling 4000+ records across Students, TutorStudent links, Comments, Session History, and Lessons tables - Optimized performance achieving sub-0.5 second load times through strategic caching, pagination, and efficient data retrieval patterns - Developed AI-assisted development workflow using structured prompt engineering to accelerate delivery while maintaining full ownership of system architecture - Maintained comprehensive technical documentation including version control, changelogs, and API specifications - Technologies: JavaScript, HTML/CSS, RESTful APIs, SQL-style data modeling, Google Apps Script, Git

Tutor Availability Platform – SaaS Integration & Internal Tools - Built availability and scheduling platform augmenting existing SaaS (Teachworks) with calendar integration and enhanced staff visibility - Engineered calendar data parsing system integrating iCal feeds with spreadsheet-backed structured datastore - Developed SPA-style UI with filter/search controls, automated caching, and time-driven triggers for real-time updates - Implemented cross-system data orchestration and business process automation connecting multiple vendor platforms - Designed UX patterns replicating familiar SaaS experiences for rapid user adoption - Technologies: Google Apps Script, Calendar APIs, JavaScript, Spreadsheet-based data systems, Workflow automation

Graduate Intern – Recreation and Sport Management

Coastal Carolina University | Conway, SC | Jan 2025 – May 2025

- Developed and executed social media marketing strategies for Division I Track and Field program, creating content calendar and analyzing engagement metrics
- Produced high-performing video content and graphics using Adobe Creative Suite, optimizing for platform algorithms and audience engagement
- Implemented SEO strategies and data analysis workflows to track campaign performance and inform content decisions
- Managed internal communications and coordinated media teams at competitions, demonstrating cross-functional collaboration
- Collaborated with coaches using Microsoft Suite for project coordination and documentation

Student Media Associate

Coastal Carolina University | Hybrid | Nov 2023 – Apr 2024

- Created and edited short-form video content for athletics social media, producing organic high-performing videos for basketball programs
- Utilized video post-production tools to create hype montages, game summaries, and athlete features aligned with branding guidelines

Student Social Media Associate

University of New Mexico, Communications and Marketing | Albuquerque, NM | Jul 2021 – Jul 2023

- Grew UNM TikTok from 7K to 17K followers (+143%) and created highest-performing videos for UNM's Instagram through data-driven content strategy
- Developed and executed integrated marketing campaigns using SEO, lead generation, and data analytics to drive engagement
- Managed content calendar and analyzed social media algorithms to optimize posting strategy and maximize organic reach
- Produced multimedia content including video editing, scripting, filming, and graphic design using Adobe Creative Suite
- Demonstrated proficiency in content management systems (Sprout Social, Notion) and workflow optimization

Content Creator & Social Media Strategist

@itsnemo.mp4 (Personal Brand) | Remote | 2019 – Present

- Built and maintain organic following of 250K+ across TikTok (213K+) and Instagram (64K+) through consistent content strategy
- Monetized platform through NIL partnerships, sponsorship deals (ongoing nutrition sponsorships), and merchandise sales
- Analyze platform algorithms, engagement metrics, and audience insights to optimize content performance and growth
- Create lifestyle, comedy, and athletic content demonstrating storytelling, video production, and brand-building skills
- Demonstrates deep understanding of content virality, retention hooks, and conversion paths applicable to growth marketing

EDUCATION

Master of Science – Recreation and Sport Management

Coastal Carolina University | Conway, SC | Aug 2023 – May 2025 (expected)

- Focus: Sports marketing, event management, and organizational leadership

Bachelor of Science – Computer Science | GPA: 3.62 | cum laude

University of New Mexico / Albuquerque, NM / Aug 2019 – Dec 2022

- Honors: UNM Scholars, Mountain West Scholar-Athlete, Academic All-Conference, 2022 Inspiring Graduate
- Relevant Coursework: Software Engineering, Computer Networking, Operating Systems, Data Structures & Algorithms, Design of Large Programs
- Key Project: Developed forensics database for UNM Office of Medical Investigator with team - designed SQL database architecture and web application frontend from technical specifications

ADDITIONAL EXPERIENCE & LEADERSHIP

Mathematics Tutor

Angwin Academy / Remote / Jun 2024 – Present

- Tutor SAT/ACT prep, math, science, and history for students grades 6-12, developing tailored communication strategies

Computer Science Peer Tutor

University of New Mexico / Albuquerque, NM / Sep 2021 – May 2022

- Taught computer science concepts to college students, demonstrating technical communication and instructional skills

Division I Student-Athlete – Track & Cross Country

UNM & Coastal Carolina University / Various / 2018 – 2025

- Balanced rigorous academic (3.62 GPA), athletic, and professional commitments while working multiple jobs
- Developed elite-level time management, discipline, and goal-setting skills transferable to professional environments
- Training toward 2028 U.S. Olympic Trials, demonstrating long-term focus and performance mindset
